

ROOM PRESSURE MONITOR

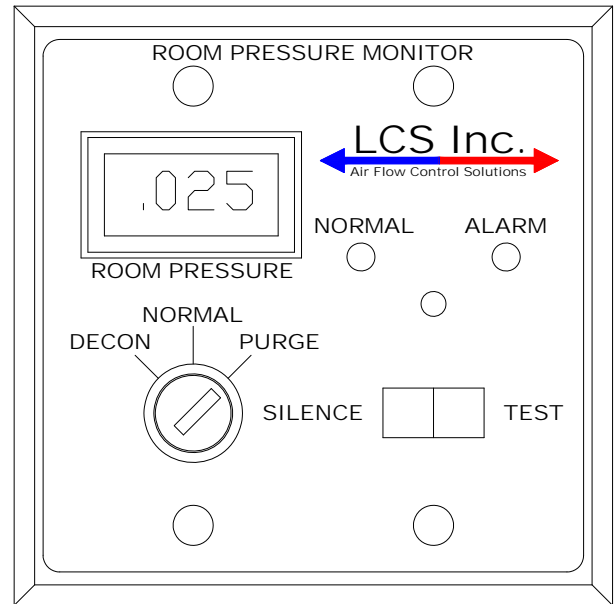

RPM-MZ-6

GENERAL DESCRIPTION

The Room Pressure Monitor is a user interface module designed to provide room pressure operating and alarm status, alarm indication and acknowledgment functions. Alarm setpoints and time delays, prior to alarming, are programmable. Once the alarm condition ceases to exist the alarm and mute functions are reset automatically.

Alarm annunciation is as follows:

- Normal condition: Green LED lighted
- Alarm condition: Red LED lighted
 - Low room pressure
 - High room pressure
- Caution or control transition:
 - Green and red LEDs flash alternately
- Buzzer:
 - Energized in any alarm condition (pulsating tone)
- Push Button:
 - Blue: Alarm acknowledgment / audible mute
 - Red: Test Function - Alarm LED and Horn
 - Depress button: Alarm LED lighted and alarm buzzer, continuous tone
 - Depress button again: Test mode canceled
- Key Switch:
 - DECON: Decontamination Mode
 - NORMAL: Normal Operation
 - PURGE: Purge Mode
